

# 10-11 YEARS | WEEK 30

## Science-General Concepts

---

1. Biology - Human body

---

2. Biology - Digestive system

---

3. Biology - Respiratory system

---

4. Biology - Dentistry

---

5. Biology - Skeletal

---

6. Plant's Life

---

7. Digestive System

---

8. Sorting- Simple machines

---

9. Our solar system

---

10. Recall and write

---

11. The young one

---

12. Tropical Animals

---

13. Hazardous substances and precautions

---

14. Can you do it

---

15. States of matter

---

16. Crossword

---

17. Label

---

18. Fill and complete

---

19. Cut and paste

---

20. Identify and write

# S: Biology - Human body

Read the sentences given below and identify the body part.

1 I have many jobs. I make bile to help your stomach break down food. I also store nutrients your body needs. I also make antibodies to help you fight disease. What am I?

A \_\_\_\_\_

2 I am a muscle located behind your lungs. I am always moving, and I never get tired. I pump blood to all parts of your body. What am I?

A \_\_\_\_\_

3 We take oxygen that your body needs from the air and put it in your bloodstream. We also take carbon dioxide that is in your blood and send it out of your body. What are we?

A \_\_\_\_\_

4 I control your muscles and all of the organs in your body. I make sure you breathe automatically, ensure your heart beats properly, and remind you to blink your eyes. I even hold all of your thoughts and memories. What am I?

A \_\_\_\_\_

5 We give your body support and structure. We also protect your delicate organs, like your brain, liver, and lungs. We are filled with a substance called marrow. What are we?

A \_\_\_\_\_

6 When you eat, I mix your food with chemicals made by your body, then I churn up your food into smaller parts. What am I?

A \_\_\_\_\_

Answer Key: 1. liver, 2. heart, 3. lungs, 4. mind, 5. bones, 6. stomach

# S: Biology - Digestive system

Define the following stages of process during digestion.

1. Biting

5. Stomach

2. Chewing

6. Small Intestine

3. Swallowing

7. Large Intestine

4. Esophagus

8. Waste Removal

Answer Key: 1 A part of the food is bitten off into a piece., 2. Food is chewed to break it into smaller pieces., 3. Food is swallowed pushing it into esophagus., 4. Esophagus propels food to the stomach., 5.The stomach muscles mix the food and liquid with digestive juices., 6. The walls of the small intestine absorb water and the digested nutrients into your bloodstream., 7. The large intestine absorbs water and changes the waste from liquid into stool.,8. The rectum pushes stool

# S: Biology - Respiratory system

The respiratory system is the network of organs and tissues that help us breathe. It includes our airways, lungs, and blood vessels. Label the parts of respiratory system in the image given below.

Answer Key 1. Nostrils, 2. Pharynx, 3. Larynx, 4. Right lung, 5. Trachea, 6. Left lung
