

11-12 YEARS | WEEK 20

Science-Biology Concepts

1. Biology - Body movements

11. Word search

2. Biology - Digestive system

12. Can you do it

3. Biology - Respiratory system

13. Fill and complete

4. Biology - Dentistry

14. Know and write- Diseases

5. Biology - Skeletal

15. Classify and name- Organism

6. Where do they Live?

16. Match

7. Sources of Food

17. Word search- Food

8. My First Aid Box

18. Identify and write- Nutrient value

9. Recall and write

19. Think and write- Nutritional component

10. Choose and write

20. Identify and write

S: Biology - Body movements

There are so many movements that happen in our bodies. we can move a few parts of our body easily in various directions and some only in one direction. Try to move the various parts of your body and mark their movements in the boxes given below.

Neck	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Wrist	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Finger	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Knee	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Ankle	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Toe	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Head	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

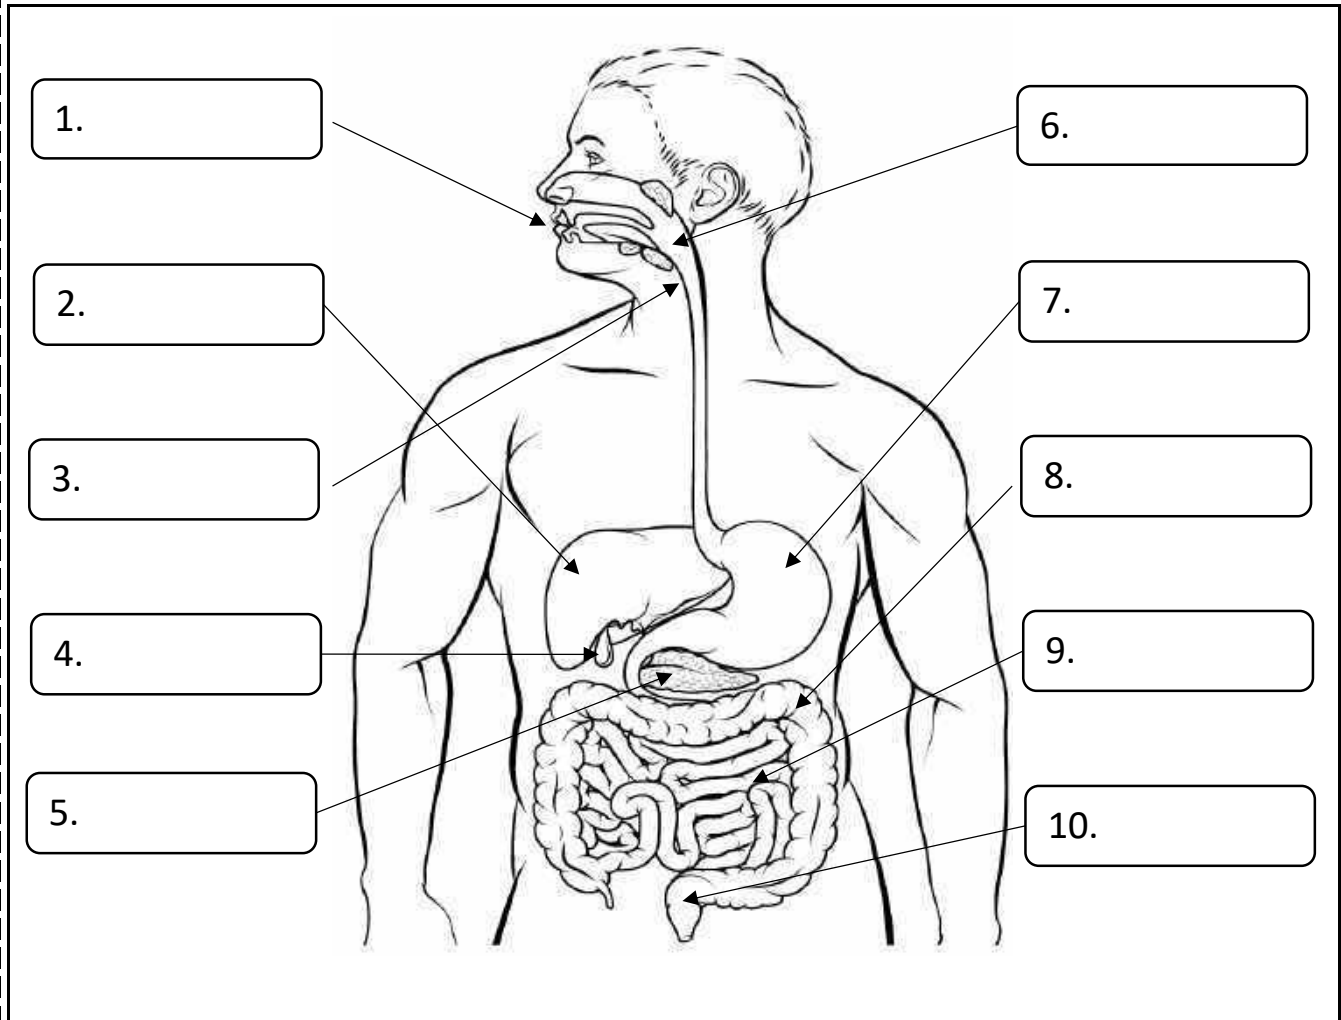

Elbow	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

Arm	
rotates completely	
rotates partly	
bends	
lifts	
does not move at all	

S: Biology - Digestive system

The digestive system of the human body comprises of a group of organs working together to convert food into energy for the body. Using the keywords, label the parts of digestive system in the given picture.

Mouth

Pharynx

Esophagus

Stomach

Liver

Pancreas

Gallbladder

Rectum

Large Intestine

Small Intestine

Answer Key: 1. mouth, 2. liver, 3. esophagus, 4. gallbladder, 5. pancreas, 6. pharynx, 7. stomach, 8. large intestine, 9. small intestine, 10. rectum.

S: Biology - Respiratory system

The respiratory system consists of a group of organs and tissues that help us to breathe.
Find the words related to respiratory system in the below grid. Words are hidden horizontally, vertically and diagonally.

s	e	e	d	l	i	n	g	l	q	w	e	p	l	a	n	t	o
