---

20. Creative expression - What I want to be

This image shows a full page of white paper with horizontal dashed lines, typical of primary-ruled notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

It makes me responsible.

# E: Mechanical - Design your model

A spectroscope splits light into the wavelengths that make it up. Early spectroscopes used prisms that split the light by refraction — bending the light waves as they passed through the glass. Build your own cardboard spectrometer using available materials at home.

Write the materials you used and the steps in making a cardboard spectrometer.

# A: Literacy - Creative writing

The purpose of creative writing is to express thoughts, feelings and emotions rather than to simply convey information. In the space given below write about your school surroundings in a very imaginative and creative way.
